

# RUBEN FIGUEROA JIMENEZ

## FRONTEND DEVELOPER

Toronto, Ontario | (437) 499 - 2114 | rubenfig2011@gmail.com | hefigjim.com | github.com/HeFigJim | linkedin.com/in/hefigjim

### PROFESSIONAL SUMMARY

Meticulous and committed with strong skills and excellent work ethic. I graduated as a Computer Engineer from California State University, Bakersfield, where I developed object detection (Python) and robot path planning programs (C++). After Graduating, I got a job as a Frontend Developer, where my passion for web development flourished. Watching an idea come to life is always the best part as a web developer, but I equally enjoy refactoring code and debugging.

### SKILLS

**Languages** - Javascript, HTML, Typescript, CSS, SQL, C++, Python

**Libraries/Frameworks** - Reactjs, Nextjs, Tailwind, Nodejs, Expressjs, Mongoosejs.

**Tools** - Figma, Adobe, Postgres, MongoDB, GitHub, Git, Redux Toolkit, SASS

### WORK HISTORY

#### Freelance

01/2023 – Present

- Developed user-friendly Reactjs components and improved Web Page performance utilizing the Redux Toolkit.
- Used Reactjs to develop forms that improved user interaction and enhanced user experience.
- Designed RESTFUL APIs CRUD operations to include features like login limiter and new user password encryption.
- Added authentication and authorization to routes to limit access and increase website security (JWTs and Cookies).
- Used semantic, responsive design with accessibility and SEO optimization.
- Created more customizable components with Tailwind CSS.

#### Frontend | CEYY – Mexico

08/2021 – 12/2022

- Optimized and debugged existing websites by cleaning unnecessary Reactjs re-renders and duplicated functions.
- Updated and organized component CSS to follow BEM principles.
- Improved database SQL query times by up to 15%.
- Updated legacy code to follow new accessibility and semantic HTML standards.
- Added proper description to all my git commits.
- Collaborated with Product Managers and Lead Engineers on new features and projects.

### PROJECTS

#### Social Media Dashboard, Freelance

2023

- Connected Social media Dashboard to Meta API using user accounts to retrieve profile information such as followers and views.
- Designed a responsive UX allowing users to see multiple social information simultaneously and manually change theme colors from the web app.

#### Card Details Feature – Freelance

2022

- Added regex to verify User input, set requirements, and filter normalized information.
- Created responsive web apps from Figma design files while adjusting values to improve UX/UI.

#### Chopo Laboratories, CEYY

2022

- Increased React component responsiveness by improving filtering and data prefetching.
- Collaborated with Senior Engineers and Product Management throughout the entire software development life cycle.

### EDUCATION/CERTIFICATES

- Computer Engineering @ California State University, Bakersfield 05/2019
- Structures and Algorithms using C++ - IBM Skills EDX 03/2023
